

Features & Benefits

Strong, robust hardware and fittings that complete the look

Our Waterloo range is supplied with a range of durable and high quality hardware for all of our systems.

Our Partitioning Systems are fitted with our exclusive 'Wave' hardware systems and stainless steel fittings for maximum reliability. We also use high quality reinforced aluminium headrails for added system strength.

And our Locker Systems use Europe's market leader, Ojmar locks, for our wide range of lock options.

Ease of installation

Laminex Waterloo Partitioning Systems are delivered cut-to-size and pre-drilled as 'flat packs,' complete with instructions and tools. In addition, our substrates are able to be cut on site if required.

This offer is available to all our account customers, but if you need someone to install our system for you, we have a nationwide approved referral installation network.

Sustainability

Laminex is committed to sustainability. It underpins all of our processes, from product manufacturing to building practices and forest management.

Our Laminex Waterloo range consists of two Global GreenTag rated substrates; Laminex Multipurpose Compact Laminate & Laminex Structural MR® MDF. Both are manufactured in wood sourced materials from sustainable, non-controversial plantations and achieve GreenRate Level A ratings.
